May 8, 2016 New "Save to Disk" option allows you to generate and save screenshots as a.jpg (Jpeg) or.png (Png) file, or.gif (Gif) file. Screenshots . For a better photo layout view, go to Settings > Options > Default view. May 7, 2018 To add, merge, or delete "Pages" in the media library, highlight the page and click Add, Merge, or Delete. You can use the "drag down" feature to add additional pages. Simply drag down to add more pages. To view the "Pages" in the media library, select the "2D Photo" tab. This is normally the last tab you select. Rasterized borderlines . To disable the rasterized borderlines, go to Settings > Options and deselect "Use rasterized borders". The borderlines are simply an aesthetic feature. To create a.jpg file of the photo layout for use in email, open the "Export" dialog and choose "2D Photo (JPEG)" or "2D Photo (PNG)". Sparkbooth 12 serial generator keygen Jan 9, 2019 The Transform button in the "2D Photo" tab has been renamed to something that is more user-friendly. The current name of the button will now just be "Transform". (see image, below). Sparkbooth 13 serial generator keygen Oct 9, 2016 To create editable photo layouts with old Sparkbooth 2 version, this "leak" version of Sparkbooth might be useful. Q: SQL Server while loop, first loop executes, then exits loop I want to write a while loop and have the following logic, if (Exist()) { _connection.Open(); _command.ExecuteNonQuery(); } else { _connection.Open(); _command.ExecuteNonQuery(); } Unfortunately I've found that the second command is never executed. A: I want to write a while loop and have the following logic, That is not how you do it. The while loop normally runs until it finds a first true. If Exist() is the only command that runs, then the
